

Australia - Geography Y5

Australian flag

Aboriginal flag

Captain James Cook

Industry: Activity where raw materials are changed into goods that can be used and traded.

Aboriginal People: People living in Australia from the earliest times, before the arrival of settlers or colonists.

Colony: A country, or an area, under the control of another country and often occupied by settlers from that country.

Mining: Where a raw resource is extracted from the earth, e.g., coal

The Commonwealth: A group of countries that used to be part of the British Empire, but now voluntary work together on issues such as human rights.

Uluru: a massive sandstone rock in Australia's Northern Territory. It is sacred to indigenous Australians and is thought to have started forming around 550 million years ago!

Biome: a community of plants and animals that have shared characteristics due to the environment they live in.

deciduous forest	tropical forest	savannah	semi desert	desert
trees drop their leaves in winter	tall trees growing close together	tall grassland and scattered trees	short grass and small, dry bushes	sand and stone with few plants
Tasmania and East Coast	North coast, Queensland	further inland on East Coast, parts of New South Wales	across Australia including large parts of Western Australia	Western and Central Australia
