

What plants need

Water

Light

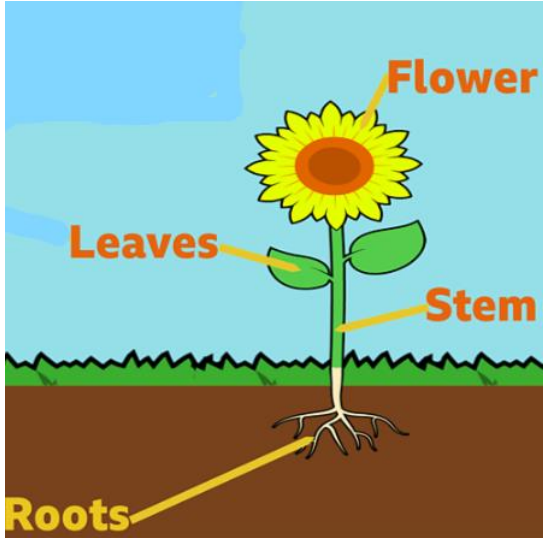

The right temperature

Space

A botanist is someone who studies plants.

Parts of plants

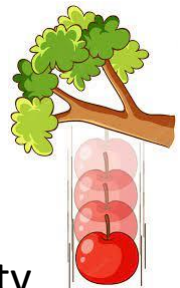

Seed dispersal

Plants need seeds to grow. Seeds need to be dispersed (spread out) to reproduce (make more)

Wind

Animals

Gravity

Deciduous and evergreen plants

Deciduous-
Leaves fall off

Evergreen-
Leaves stay on

Plants we eat

Edible- something you can eat

Some plants we cannot eat (inedible).

Carrot-
A plant we can eat but we take off the leaves.
